Summary

Final-year Computing Systems student building cloud-native, distributed, and security-focused software systems.

Featured Projects

- LYTA — Stateful edge-native AI workspace (Cloudflare Workers, Durable Objects, Workers AI)
- OpenShield — Open-source Azure CSPM platform (Python, Flask, Azure, PostgreSQL)
- KALYX — Execution integrity verification platform (Python, FastAPI, Pydantic)
- FieldSight — Cloud-native multimedia platform on Azure (Node.js, Cosmos DB, Blob Storage)
- Payment Routing System — Role-aware payments backend (Angular, Flask, MongoDB, JWT)

Experience

Operations & IT Support Assistant — Kukreja & Associates

July 2021 – December 2023 | Vadodara, India

- Automated internal operational workflows reducing manual workload by 10+ hours per month.
- Provided IT support across systems, networking, and hardware environments for 50+ users.
- Diagnosed technical issues and implemented process improvements to improve reliability.

Education

BSc (Hons) Computing Systems — Ulster University, London (Expected Sep 2026)

Dean's List — Academic Excellence (Year 1 & Year 2)
